We have implemented:

Finnish travel platform <https://gostg.fi/>

- The integration of booking products and informing about the products themselves is formed in the existing Bokun CRM, with the help of which product information is initially integrated into the structure of the website.
- Integration with Booking
- Different user areas and access levels
- Design of a user-friendly management system for the internal structure of the site (CMS).
- The website should be a selling service, user-friendly and intuitive.
- SEO & SMM on the European market

FROM THE WILL TILL THE REALITY
